RE; DOCKET 92-235

Dear Ms Searcy;

In regard to the Spectrum Frequency Refarming proposal. We, as a organized Volunteer Fire Department of the Tannehill, Scipio, Lake Area feel the time allotted for changing to a different Communication System is for to soon.

It has taken us all of approximately twelve years to attain our present pager system with a cost of over \$6,000.00. Our Department depends solely upon telephone and pager systems to cover 128 square miles. All of this with donated equipment.

We feel this will bring a severe hardship on all volunteer Fire Departments, With the only possible solution being disbandment. With a complete failure of Fire Protection for over 300 Households.

Thanking you for some consideration to this matter.

Very Sincerely,

*Robert Hass*
